Subject Index to Volume 23

Arid Land Sensing

Aircraft and Satellite Remote Sensing of Desert Soils and Landscapes, G. W. Petersen, K. F. Connors, D. A. Miller, R. L. Day, and T. W. Gardner, 253

Reflectance Modeling of Semiarid Woodlands, R. P. Pech and A. W. Davis, 365

Remote Sensing Science Applications in Arid Environments, P. T. Tueller, 143

Suitability of Spectral Indices for Evaluating Vegetation Characteristics on Arid Rangelands, A. R. Huete and R. D. Jackson, 213

The Use of Spectral and Spatial Variability To Monitor Cover Change on Inert Landscapes, G. Pickup and B. D. Foran, 351

Desert Landscapes

Aircraft and Satellite Remote Sensing of Desert Soils and Landscapes, G. W. Petersen, K. F. Connors, D. A. Miller, R. L. Day, and T. W. Gardner, 253

Suitability of Spectral Indices for Evaluating Vegetation Characteristics on Arid Rangelands, 213

Drought Monitoring

Satellite Observed Seasonal and Inter-Annual Variation of Vegetation Over the Kalahari, The Great Victoria Desert, and The Great Sandy Desert: 1979–1984, B. J. Choudhury and C. J. Tucker, 233

Satellite Remote Sensing of Drought Conditions, C. J. Tucker and B. J. Choudhury, 243

Emissivity

Emissivities of Quartz and Sahara Dust Powders in the Infrared Region (7–17 μm), T. Takashima and K. Masuda, 51

Forest Canopy Structure

Measurements of the Backscatter and Attenuation Properties of Forest Stands at X-, C- and L-Band, D. H. Hoekman, 396

Geobotany

A Geobotanical Investigation Based on Linear Discriminant and Profile Analyses of Airborne Thematic Mapper Simulator Data, M. R. Schwaller, 23

Illumination Source

A Transportable Hemispherical Illumination System for Making Reflectance Factor Measurements, D. L. Williams and F. M. Wood, Jr., 131

Imaging Spectrometry

Discriminating Semiarid Vegetation Using Airborne Imaging Spectrometer Data: A Preliminary Assessment, R. W. Thomas and S. L. Ustin, 273

Landsat

Detection of Yearly Cover Change with Landsat MSS on Pastoral Landscapes in Central Australia, B. D. Foran, 333

Satellite Remote Sensing of Australian Rangelands, R. D. Graetz, 313

Lineament Mapping

Geostructural Evolution of the Southern Alps: Lineaments Trends Detected on Landsat Images, E. Zilioli and M. Antoninetti, 479

Lithologic Mapping

Possible Techniques for Lithologic Discrimination Using the Short-Wavelength-Infrared Bands of the Japanese ERS-1, Y. Yamaguchi, 117

Ocean Color

Satellite-Derived Color–Temperature Relationship in the Alboran Sea, R. A. Arnone, 417

Radar Backscatter

Fresnal Field Interaction Applied to Scattering From a Vegetation Layer, A. K. Fung, M. F. Chen, and K. K. Lee, 35

Measurements of the Backscatter and Attenuation Properties of Forest Stands at X-, C- and L-Band, D. H. Hoekman, 396

Radiation Modeling

A Canopy Reflectance Model Based on an Analytical Solution to the Multiple Scattering Equation, P. Camillo, 453

A Model for Soil Surface Roughness Influence on the Spectral Response of Bare Soils in the Visible and Near-Infrared Range, J. Cierniewski, 97

Reflectance Modeling of Semiarid Woodlands, R. P. Pech and A. W. Davis, 365

Surface Anisotropy and Hemispheric Reflectance for a Semiarid Ecosystem, E. M. Middleton, D. W. Deering, and S. P. Ahmad, 193

Range

Aerial and Ground Spectral Characteristics of Rangeland Plant Communities in Nevada, R. O. Wilson and P. T. Tueller, 177

Near-Real-Time Video Systems for Rangeland Assessment, J. H. Everitt, D. E. Escobar, and P. R. Nixon, 291

Spectral Assessment of Indicators of Range Degradation in the Botswana Hardveld Environment, S. Ringrose and W. Matheson, 379

Suitability of Spectral Indices for Evaluating Vegetation Characteristics on Arid Rangelands, A. R. Huete and R. D. Jackson, 213

Reflectance Measurements

A Transportable Hemispherical Illumination System for Making Reflectance Factor Measurements, D. L. Williams and F. M. Wood, Jr., 131

Aerial and Ground Spectral Characteristics of Rangeland Plant Communities in Nevada, R. O. Wilson and P. T. Tueller, 177

Spectral Characteristics of Selected Soils and Vegetation in Northern Nevada and Their Discrimination Using Band Ratio Techniques, M. B. Satterwhite and J. P. Henley, 155

Satellite Sensors

Differences in Vegetation Indices for Simulated Landsat-5 MSS and TM, NOAA-9 AVHRR, and SPOT-1 Sensor Systems, K. P. Gallo and C. S. T. Daughtry, 439

Sea Surface Temperature

Satellite-Derived Color–Temperature Relationship in the Alboran Sea, R. A. Arnone, 417

Sedimentation

Using Landsat Multispectral Scanner Data to Estimate Suspended Sediments in Moon Lake, Mississippi, J. C. Ritchie, C. M. Cooper, and J. Yongqing, 65

Soil Surface Reflectance

A Model for Soil Surface Roughness Influence on the Spectral Response of Bare Soils in the Visible and Near-Infrared Range, J. Cierniewski, 97

Spectral Characteristics of Selected Soils and Vegetation in Northern Nevada and Their Discrimination Using Band Ratio Techniques, M. B. Satterwhite and J. P. Henley, 155

Vegetation Indices

Differences in Vegetation Indices for Simulated Landsat-5 MSS and TM, NOAA-9 AVHRR, and SPOT-1 Sensor Systems, K. P. Gallo and C. S. T. Daughtry, 439

Satellite Observed Seasonal and Inter-Annual Variation of Vegetation Over the Kalahari, The Great Victoria Desert, and The Great Sandy Desert: 1979–1984, B. J. Choudhury and C. J. Tucker, 233

Satellite Remote Sensing of Drought Conditions, C. J. Tucker and B. J. Choudhury, 243

Spectral Characteristics of Selected Soils and Vegetation in Northern Nevada and Their Discrimination Using Band Ratio Techniques, M. B. Satterwhite and J. P. Henley, 155

Suitability of Spectral Indices for Evaluating Vegetation Characteristics on Arid Rangelands, A. R. Huete and R. D. Jackson, 213

Vegetation Reflectance

A Geobotanical Investigation Based on Linear Discriminant and Profile Analyses of Airborne Thematic Mapper Simulator Data, M. R. Schwaller, 23

Detection of Yearly Cover Change with Landsat MSS on Pastoral Landscapes in Central Australia, B. D. Foran, 333

Differences in Vegetation Indices for Simulated Landsat-5 MSS and TM, NOAA-9 AVHRR, and SPOT-1 Sensor Systems, K. P. Gallo and C. S. T. Daughtry, 439

Directional Reflectance Factor Distributions for Two Forest Canopies, J. Kleman, 83

Satellite Observed Seasonal and Inter-Annual Variation of Vegetation Over the Kalahari, The Great Victoria Desert, and The Great Sandy Desert: 1979–1984, B. J. Choudhury and C. J. Tucker, 233

Surface Anisotropy and Hemispheric Reflectance for a Semiarid Ecosystem, E. M. Middleton, D. W. Deering, and S. P. Ahmad, 193

Vegetation Monitoring

Detection of Yearly Cover Change with Landsat MSS on Pastoral Landscapes in Central Australia, B. D. Foran, 333

Discriminating Semiarid Vegetation Using Airborne Imaging Spectrometer Data: A Preliminary Assessment, R. W. Thomas and S. L. Ustin, 273

Satellite Observed Seasonal and Inter-Annual Variation of Vegetation Over the Kalahari, The Great Victoria Desert, and The Great Sandy Desert: 1979–1984, B. J. Choudhury and C. J. Tucker, 233

Satellite Remote Sensing of Drought Conditions, C. J. Tucker and B. J. Choudhury, 243

Satellite Remote Sensing of Australian Rangelands, R. D. Graetz, 313

Spectral Assessment of Indicators of Range Degradation in the Botswana Hardveld Environment, S. Ringrose and W. Matheson, 379

Suitability of Spectral Indices for Evaluating Vegetation Characteristics on Arid Rangelands, A. R. Huete and R. D. Jackson, 213

The Use of Spectral and Spatial Variability To Monitor Cover Change on Inert Landscapes, G. Pickup and B. D. Foran, 351

Video

Near-Real-Time Video Systems for Rangeland Assessment, J. H. Everitt, D. E. Escobar, and P. R. Nixon, 291
